

# Year 12

Wednesday 5<sup>th</sup> July will be a home study day for all students. Some suggestions are below:

- Use some time to make sure your **files and planner** are organised, that you have all work and that you're clear on all upcoming deadlines.
- Use the normal channels your teachers use for sharing **independent study advice**- Teams, etc. You should all be clear what additional work will boost your learning in each subject.
- You can log on to the **Sixth Form library** provision remotely- JSTOR and other articles can be accessed from home. Use the time to do some wider reading in preparation for an upcoming essay or project.
- Focus on **NEA**, which has started in many subjects this term. Check lists and instructions given by staff and use the day to get ahead.
- **UCAS** Applications: completing key information and drafting personal statement. Remember all students need to begin an application; key information can then be copied over into apprenticeship and other applications if you choose a different route.
